TECHNICAL SKILLS

Languages

JavaScript TypeScript
Python

Frontend

React.js Next.js Tailwind CSS

Backend & Cloud

Node.js AWS (Lambda, SQS)
Firebase Supabase

Databases & Tools

MySQL PostgreSQL
Git/GitHub Vercel

SERVICES

- Business Workflow Systems
- WhatsApp & API Automation
- Rapid MVP Development
- AI Model Integration

Software Engineer focused on crafting AI-powered business software for SMEs and Startups. Expert in automating daily operations through polished interfaces and robust cloud-based architectures.

EXPERIENCE

Software Engineer

CitNow Group

March 2025 – Present

- Managing large-scale legacy codebases with emphasis on clean architecture and maintainability.
- Developing AWS Lambda functions for backend workflows and complex business integrations.
- Participating in peer code reviews to ensure system readability and architectural consistency.

Senior Software Engineer

Tuvoc Technologies

- Architected full-stack web applications and designed custom workflow tools using modern JavaScript frameworks.
- Managed cloud deployment pipelines, optimizing application hosting costs and scaling efficiency.

Software Engineer

DRC Systems

- Executed comprehensive legacy migrations, including database transitions from MySQL 5.6 to 8.0.
- Collaborated closely with creative teams to translate high-fidelity user interface mockups into performant code.

Software Engineer (Prior Roles)

ScrumWheel Technologies, Infosys

- Engineered scalable enterprise web solutions and contributed to core backend feature sets.

KEY PROJECTS

Textile Wholesale Management Platform

Next.js | Firebase

Automated manual WhatsApp-based workflows for a wholesaler. Integrated role-based quotation generation and automated PDF creation.

Contractor Management System

React.js | Supabase

Streamlined production tracking for a manufacturing unit, eliminating manual bookkeeping and providing real-time visibility into contractor liabilities.

EDUCATION

Bachelor of Engineering – Focus on Web Technologies (Developing since 2012)
